Anurag Mishra

Co-Founder, CipherSchools | Ed-tech in Higher Education
Chandigarh

Summary

Hi, I'm Anurag,
Mentioned below is the sneak peek of my journey so far,

-I dropped out of Navy, after 12th

-Did my engineering(from a Tier less college, indeed)

-Worked with the startup Acadview, which was founded by an ex-Googler: Started my career as a subject matter expert(SME) got promoted to SME Manager, and later was given a responsibility of a Supply.

-Founded a company HireScript: Which was solving the problem of the internship. We were connecting pre-vetted people looking for internships with the company hiring interns.

-Have taught and is still teaching A.I, VR, Android app development and web development to the kids from std 4th to 12th

-Worked as a Supply Head at upGrad (Ronnie Screwvala Venture)

-Quit my job and

-Co-founded: CipherSchools,
where we are solving problems of undergraduate (students) and making them skillable enough to be able to crack into the good companies for a job.

PS: 24 YO, I come from a middle-class family where watching T.V when you're in school age is a dangerous activity. My ears used to focus on T.V and Dad's motorcycle sound when he wasn't around to be able to take a decision of rushing to my study table on his arrival.

I am reachable on [anurag\[at\]cipherschools\[dot\]com](mailto:anurag@cipherschools.com)

Experience

CipherSchools
