Talkrrr
Developed a webapp using node, angular, ibm watson, aanyang, mongo,
loopback to make the website talkative like apple siri and performed various
task on certain commands
Users were able to run their custom scripts and even they can set their
commands too
It switches internally to use browser inbuilt speech api to save the use of Ibm
Watson resulting less to pay
Learned ionic for the hybrid development to built app for both platform ios and
android
